**Features:** Multiple mounting options for outdoor application. Convex mirrors come with our advanced mounting hardware kit for easier mounting. Larger mirror diameter of 26" and above being used outside may require "Double Hardware" for safe mounting (call for pricing).

**Specifications:** Made from shatter resistant acrylic, glass or unbreakable polycarbonate.

**Acrylic:** Our most popular mirror, shatter resistant, excellent clarity. Made of a lightweight material that offers superb reflection, similar to that of mirrored glass

**Glass:** Excellent clarity, will not scratch easily. Easy to clean, wet or dry and is unaffected by most cleaning chemicals. Shatter Resistant Glass is enhanced with vinyl glazing tape.

**Polycarbonate:** Made to be indestructible/unbreakable and is used in high security areas. Extremely lightweight (approximately one-third of the weight of glass), it offers superior optical clarity, making it material of choice for use in areas where glass mirrors would be unsafe or too heavy.

**Backing:** Outdoor models have weatherproof white hardboard backing.
